## **RESPONSE TO AMENDMENT**

1. This communication is responsive to amendment received August 15, 2006.

Claims 1, 2, 4, 6, 7, 9-13, 16-17, 19, and 22-23 have been amended.

Claims 3, 5, and 8 have been cancelled.

Claims 1-2, 4, 6-7, 9-23 are pending further examination.

## Election/Restriction

2. After further review and consideration of the recent amendments, it is apparent that a restriction requirement is needed.

Restriction to one of the following is required under 35 U.S.C. 121:

- I. Claims 1-2 and 4 are drawn to a method for performing route lookups classified in class 709, subclass 238.
- II. Claims 6-7 is drawn to a system for processing packet information for routing packets classified in class 709, subclass 223.
- III. Claim 13-18 is drawn to a device for performing route computations and updating the routing information classified in class 709, subclass 242.
- IV. Claims 9-12, and 19-23 are drawn to performing concurrent route lookups by a plurality of processing engines by monitoring processing states of the processing engines classified in class 709, subclass 224.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 09/985,676

Art Unit: 2155

Subcombination-Usable Together

Page 3

3. Inventions I, II, III and IV are related as subcombinations disclosed as usable

together in a single combination. The subcombinations are distinct from each other if

they are shown to be separately usable. In the instant case, invention I has separate

utility such as performing route lookups for a plurality of data received via a network.

Invention II has separate utility such as computer network managing. Invention III has

separate utility such as updating routing information for a received data. invention IV

has separate utility such as computer network monitoring. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art as shown by their different classification, restriction

for examination purposes as indicated is proper.

5. A telephone call was made to applicant's representative on October 24, 2006 to

request an oral election to the above restriction requirement, but did not result in an

election being made.

6. Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected

invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
